Healthcare Industry Partners

At a glance

ENHANCE is a newly developed high level assessment program delivered by HGP Asia for pharmaceutical companies in Southeast Asia.

Objective

To provide advise and strategic direction in the areas of GMP, CSV, MES and IT & Risk Compliance.

Duration and Location

ENHANCE is a 3- to 5-days program. We will work with you to establish a road-map or project initiation plan highlighting the objectives and deliverables. The program is generally delivered at your company's location or any other location related to the project.

Who we are

HGP Asia Pte. Ltd. is a management consulting and training firm providing Swiss quality services and training for the healthcare industry in the Southeast Asia region.

Enhance your competitive advantage

The pharmaceutical industry grows and changes quickly, putting significant pressure on every corporation. Every organisation in the pharmaceutical landscape has its specific characteristics, for example, implementation of electronic batch records has a very different approach from the way it is done in on one site as compared to another, and this cuts across geographical and cultural differences as well.

With the commitment to support Southeast Asian companies to prepare for global competition while facing increasing compliance challenges, HGP Asia developed the ENHANCE program. Through the ENHANCE program, HGP Asia aims to utilize its skills to help you translate your company's business objectives into measurable success.

Together with you, we will overcome daunting business challenges by making efficient use of technologies, lean processes, and standardization.

How we can help you

ENHANCE programs are carefully designed around your company needs, we can bring a variety of expertise, including:

Validation Lifecycle Management

IT Quality Management

Computer Systems Validation (CSV)

MES and Paperless Production

IT Risk & Compliance

Good Manufacturing Practice (cGMP)

Pharmaceutical Quality Management System (PQMS)

Quality Risk Management (QRM)

Good Documentation Practice (GDP)

Bioproduction Strategy

Supply Chain Management

Execution

HGP Asia will engage and deploy subject matter experts who will spend three to five days at your company working alongside some of your employees. We will put our entire experience at your disposal to develop the optimal solution for you and your business division as healthcare industry experts and local partners, far removed from any conflicts of interest. HGP Asia ENHANCE program is an unprecedented way to allow your team to swiftly and efficiently tackle some of the most pressuring challenges. We will help you define the most suitable and high-impact projects and outcomes. Generally, ENHANCE program deliverables might include a presentation to the company representative(s), or a written report (Roadmap or Initiation Plan), or a high-level concept.

How to Apply
